

THE KNOT

The process we call Mathematics... the flower of the basic intelligence. By correctly specifying rules Ideas can be manipulated into forms... of manipulated under correctly formulated set of rules produce results which... aspects of the original concept which would not be so clearly revealed.

Mathematics is not as I believe... I am not sure if I read somewhere the idea that Mathematics is the language of God however... mathematics is an original conclusion... more so poetic possesses more poetry than abstract validity. Re stated as "Mathematics is perhaps both the only certain ground man TODAY occupies in the "Kingdom of God"

I can subscribe to the idea more readily but in this form the statement will be irritating to some... I would like to try and... the same of... by explain what my restatement as obvious to bear with me while I do so)

I have felt for many years that we should cease by some to be notion of finding the bedrocks of normality and get on with it as far as we can. To do this we must try to find a some form of words... as containing truth. The... be simple, but who knows what may grow from My suggestion for a starting point is "God is Truth" No question will take offense of the State must... I would ask the atheist to whether Truth is a "God" he too can feel intellectually free to accept

Even the atheist must subscribe to the worship of Truth I would ask the atheist Abstract Truth is not a God word say

The Thoughts of Einstein for Action

Man is a lever - his philosophy... decides when the fulcrum will be placed... The pure mathematician... his effort... his own idea - vast distances, taking perhaps no rest but himself along the route

The political planner his fulcrum nearer the load... Both types of activity shape the course of man's history. The idea that E=MC^2 is a good example of this - I refer to the bombing of Hiroshima.

Einstein - a Jew - before of God, of Christ - The messiah? The King of that brings salvation to the Jews? Nuclear power! Mysteries of Prophecy! Trial and damn once more.

The stride of the mind. The phases of... development... Elementary... Secondary... Advanced... No clarification... present stage will always seem advanced to the free mind the past stage will always seem elementary.

Take the State mind E=MC^2. Some man will write without a tremor and it asked what the... M = E/C^2 and bringing to process to full stop by writing E = C \* sqrt(M)

Yet another will stare at the first expression for hours or though like a child who... realizing a new physical universe... and startlingly different... E=MC^2... Ask him this man what the expression E=MC^2 means and he will say "I do not know" both are students the first will be clear is likely to be classified as bright & promising the other as difficult or even stupid, although the former is likely to have completely missed the fact that the apparently simple statement is the link between all processes in the physical universe

But this meant... that this meant... yet fully understood

Philosophy... decides when the fulcrum will be placed... must ultimately

The shattering idea that E=MC^2 is one of the greatest... Supreme

Both types of activity

The shattering application of the

idea that E=MC^2 is a good example of this

I refer to the bombing of Hiroshima

man (inquirer)

Elementary... Secondary... Advanced...

No clarification... present stage will always seem advanced

to the free mind the past stage will always seem elementary

Take the State mind E=MC^2

Some man will write without a tremor

and it asked what the... M = E/C^2

and bringing to process to full stop by writing E = C \* sqrt(M)

Yet another will stare at the first expression for hours or though

like a child who... realizing a new physical universe

and startlingly different

E=MC^2... Ask him this man what the expression

E=MC^2 means and he will say "I do not know"

both are students the first will be clear is likely to be

classified as bright & promising the other as difficult or

even stupid, although the former is likely to have completely

missed the fact that the apparently simple statement is the link
